Report subject : [Launch announce] Double delivery

Type	Description
Launch summary	We launched Double delivery project, which brings complementary nonfood items like beverages, desserts, and alcohol into the cart By recommending items from stores that are either along the courier's initial route or nearby, we aim to lift upsell conversion and in Starting with a pilot in Songpa, Seocho, and Gangnam, we have expanded the rollout to Seoul and most portions of Busan, Incheon,

Project Introduction

Double delivery addresses missed upsell opportunities when customers look outside Eats for beverages and desserts. By surfacing recommendations after merchant accepts the food order, we can capture complementary demand and expand non-food user acquisition

Key feature flow:

- Key milestone
 - Kickoff : 10/21
 - Dev : 10/21 ~ 10/31
 - QA : 10/31 ~ 11/06
 - App release : 11/07
 - Internal test: 11/7(PM)~11/12
 - Launch (AB open traffic to customer - Gangnam/Secho/Songpa region) :11/13
 - On 11/15 : Rampup B to 5%
 - On 11/14 : Rampup B to 25%
 - On 11/18 : Rampup B to 100%

Business Impact	- Over the past week, DD(Double delivery) directly contributed to 4.6% of nationwide NF(Non-food) orders and 7.1% of NF order. - Among users who placed NF(Non-food) via DD, 80% were first-time NF users, indicating strong newuser acquisition. - Over 15% of users repurchase NF within 7 days (D+7). - XPC link (AB test): AB Test 92662
Next Plan	Following is what we are doing as followup: - Iterating on the copy of the title in the double delivery bottom sheet - Iterating on the placement of the double delivery on the realtime page
